

AIR 1 is heard on 88.7 in my area and it provides a valuable service to me and my family. I listen to it every day. It provide great, inspirational music and helpful information for people's needs. If the programming were to be displaced by an LPFM broadcaster providing other programming, it would be a loss for our community. The station promotes healthy lifestyles and provides encouragement for people that is not available elsewhere. We need this station on the air. It serves the public interest in what it provides.
